

**PRELIMINARY AMENDMENT**

National Stage Entry of PCT/JP03/10038

Attorney Docket No. Q86191

**REMARKS**

The specification at pages 38, 50, 77, 90, 98, 120, 138 and 141 has been amended to correct inadvertent errors.

Particularly, those chemical formulae exemplified at page 38 are examples of formula (5) but not of formula (4), and  $Z^2$  is referred to in formula (5).

Support for the amendment at pages 50-51 is found, for example by reference to the description at pages 12-13 and claim 29.

As to the amendment at page 77, the curable fluorine-containing polymer is defined as (I). Same with respect to the amendment at page 90.

The change at page 98 corrects a typing error.

The amendment at page 120 corrects an obvious error in that the primary factors for measuring water absorption are temperature and humidity.

The amendment at page 138 is based on the description and Tables 4 and 5. Also, the “Method of producing an antireflection film” is referred to only in (2) of Example 4 but not in Example 15. The same applies with respect to the amendment at page 141.

Additionally, the claims have been amended to remove multiple dependency. No new matter has been added.

**PRELIMINARY AMENDMENT**

National Stage Entry of PCT/JP03/10038

Attorney Docket No. Q86191

Entry and consideration of this Amendment are respectfully requested.

Respectfully submitted,

---
